

# Technical Soaring

The Technical, Scientific and Operational Journal of  
Organisation Scientifique et Technique Internationale du Vol à Voile

## EDITORS

Chief Editor

Prof. Dr. Edward (Ward) Hindman

This issue:

Capt./Cdr. Bernald S. Smith, UAL/USN (ret.)

## PRESIDENT

Prof. Ir. Loek M. M. Boermans

*The Netherlands*

## VICE PRESIDENT

Dipl. Ing. Christoph Kensche

*Germany*

## MEMBERS OF THE BOARD

Dipl. Ing. John Ashford - *Australia*

Prof. Dr. Edward Hindman - *USA*

Prof. Dr. Mark Maughmer - *USA*

Dipl. Ing. Ian Oldaker - *Canada*

Dr. Ing. Michael Rehmet - *Germany*

Dr. Hermann Trimmel - *Austria*

## CHAIRMAN,

### TECHNICAL SECTION

Prof. Dr. Mark Maughmer

## CHAIRMAN,

### SCIENTIFIC SECTION

### METEOROLOGICAL PANEL

Dr. Hermann Trimmel

## CHAIRMAN,

### SAILPLANE DEVELOPMENT PANEL

Dipl. Ing. Helmut Fendt

*Germany*

## CHAIRMAN,

### TRAINING AND SAFETY PANEL

Dipl. Ing. Ian Oldaker

## Publications Staff

Editor's Comments.....ii

## Homage

Prof. Dr. Loek Boermans.....1

Papers by Dr. Antony M. Segal

**Energy Absorbing Seat Cushions for use in Gliders**.....2

## Jump or Bump

Part 1.....6

Part 2.....8

Part 3.....10

## Aviation Medicine Notes

Note 1. Proposed Emergency Unassisted Escape System.....13

Note 2. The Risk of Deep Vein Thrombosis in Glider Pilots,  
Especially as Related to a Steeply Raked Seatpan Angle.....14

Note 3. Resonance Frequency of the Glider Undercarriage,  
and the Pilot's Body.....17

**Glider Air brake Operating Forces**.....21

## Medical Standards For Instructors Aged 65-69 Years, and 70 Years and Over

Note 1. Epidemiology of Coronary Heart Disease -  
Effect of Age.....24

Note 2. Social Inequalities in Health.....25

Note 3. Ageing and Human Performance.....26

Note 4. Incidence of Coronary Deaths in UK  
Civilian Gliding.....26

Note 5. Fatal Gliding Accidents in the UK - 1960-1980.....26

Note 6. Fatal Gliding Accidents in Austria.....26

Note 7. Cockpit Deaths in USA Civil Aviation and Age.....27

Volume 32, Numbers 1/2

Printed July 2008

The objective of *Technical Soaring* is to document recent advances in the science, technology and operational aspects of motorless aviation.

*Technical Soaring* is published quarterly by Organisation Scientifique et Technique Internationale du Vol à Voile (OSTIV); Kluuyverweg 1; NL-2629 HS Delft; The Netherlands; tel: +31.15.278.6387; fax: +31.15.278.3533; email: l.m.m.boermans@tudelft.nl.

Subscription is restricted to OSTIV members only. Rates/calendar year, based upon surface bulk delivery, are Euro45 for Individual/Local club membership; Euro80 for Scientific/Library/Technical Membership and Euro250 for Active Members (National Aero Club Members of FAI). First class or airmail delivery may be arranged for an extra fee.

Submitted papers will be subjected to a scientific, technical and/or operational review before being accepted for publication. Guidelines for preparation and submission of manuscripts can be found at the OSTIV web page: [www.ostiv.fai.org](http://www.ostiv.fai.org).

The name *Technical Soaring* and its cover layout are fully rights-protected and belong to The Soaring Society of America; they are used by permission.

**Medical Standards For Instructors Aged 65-69 Years,  
and 70 Years and Over (continued)**

Note 8 Cardiovascular Risk Assessment in Commercial Aircrew - "The One Percent Rule".....	27
Note 9 Cardiovascular Risk Assessment in Private Pilots.....	27
Note 10 Cardiovascular Risk in Glider Pilots.....	28
Note 11 Classification of Pupils.....	28
Note 12 Class Three (PPL) Medical Certification Requirements.....	28
Note 13 Probability Theory and Electrocardiography Baye's Theorem.....	28
Note 14 Analysis of Gliding Instructor Flying Statistics; Lasham Gliding Society, October 1994 - September 1995.....	28
<b>Making Accidents Survivable...with a racing-car cockpit in your glider.....</b>	<b>42</b>
<b>Surviving Mid-air Accidents.....</b>	<b>46</b>
<b>Six-point belt on test.....</b>	<b>52</b>
<b>Drop-testing a two seater.....</b>	<b>55</b>
<b>Changes to JAR 22 will double the energy-absorbing capacity of the undercarriage.....</b>	<b>61</b>
<b>Survivable Loads on the Pilot and the Crashworthiness of Glider Cockpits.....</b>	<b>62</b>
<b>Nosewheel or skid?.....</b>	<b>66</b>
<b>Rallying round to prepare to find out .....</b>	<b>69</b>
<b>Call for papers, XXIX OSTIV Congress 2008.....</b>	<b>71</b>

Note: Graphics for some papers are on pages following that paper.

*Editor's Comments:* Many thanks to the British Gliding Association, publisher of *Sailplane & Gliding*, for their help and kind permission to republish those of Dr. Segal's papers that were first published in *Sailplane & Gliding*, as noted on such article heading.

In addition, much appreciation is due, with my sincerest thanks, to Ron, of Fremont Printing for his many hours of dedication required to help put this issue together. Also, to Marilyn for her assistance on final proof editing of the pre-print draft.

Finally, you cannot have spent as much time as I have on this publishing project without having gained an enormous appreciation and respect for what Tony has accomplished in this material, representing an overwhelming amount of research and testing and work and writing that he has done. Just reading an item thru once does not do it for you!

Bernald S. Smith, Editor
