Aerodynamic Design and Cross-country Flight

Performance Analysis of Diana-2 Sailplane

Krzysztof Kubrynski79

Volume 30, Number 3

Printed February 2007

The objective of *Technical Soaring* is to document recent advances in the science, technology and operational aspects of motorless aviation.

Technical Soaring is published quarterly by the Organisation Scientifique et Technique Internationale du Vol à Voile (OSTIV); Kluiverweg 1, NL-2629 HS Delft, The Netherlands, tel:+ 31 15 278 6387, fax: + 31 15 278 3533, e-mail: l.m.m.boermans@lr.tudelft.nl

Subscription is restricted to OSTIV members only. Rates/calendar year, based upon surface bulk delivery, are Euro 45 for Individual/Local club membership; Euro 80 for Scientific/Technical Organisation/Library Membership and Euro 250 for Active Members (National Aero Club Members of FAI). First class or airmail delivery may be arranged for an extra fee.

Submitted papers will be subjected to a scientific, technical and/or operational review before being accepted for publication. Guidelines for preparation and submission of manuscripts can be found at www.ostiv.fai.org.

The name *Technical Soaring* and its cover layout are fully rights-protected and belong to the Soaring Society of America (SSA); they are used by permission.
