

From the Editor

Publication Date

This issue is the second of Volume 43 of *TS*, corresponding to April-June 2019. For the record, the issue was published in October, 2020.

About this issue

The main article of this issue of *TS* deals with the intuition of the MacCready setting. It is inspired not by sailplane but by paraglider flying and the author, Bart Taub, presents a new approach to the problem by applying ideas based on economic

theory. I wish you a pleasant reading and hope that some of the readers feel encouraged to discuss the topic with the author.

Very Respectfully,

Arne Seitz

Editor-in-Chief, *Technical Soaring*
