

From the Editor

Publication Date

This issue is the first of Volume 46 of *TS*, corresponding to January-March 2022. For the record, the issue was published in December, 2023.

About this issue

The article in this issue of *TS* deals with safety management in soaring competitions. The author proposes the adoption of so-called Safety II methods to improve safety in soaring compe-

titions and offers practical steps of how such methods could be implemented. Food for thought, which hopefully will contribute to concrete actions in the soaring community.

Very Respectfully,

Kurt Sermeus
Editor-in-Chief, *Technical Soaring*
